

# FIVCO

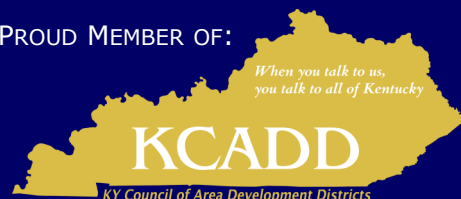

AREA DEVELOPMENT DISTRICT

## FY2016 ANNUAL REPORT

## SEPTEMBER 2016

PROUD MEMBER OF:

## THE ADDS' STRATEGIC MISSION

**Our strategic mission is simple:** The ADDs strive to foster regional strategies, solutions and partnerships that achieve sustainable economic growth and improve the overall quality of life for the citizens of Kentucky. Over the past 40+ years, the 15 ADDs have evolved from conduits for regional and local economic development planning to catalysts of change in almost all aspects of life throughout the state and in our individual regions.

We are focused on developing and sustaining the fundamental building blocks for our state, regions and local communities to compete in today's rapidly changing global marketplace. This includes our traditional emphasis on strategic planning and project funding for clean and safe drinking water systems, health care facilities, affordable housing, small business development and transportation improvements. Today, our programs and expertise extend even further, into areas such as aging, broadband, emergency preparedness, environmental stewardship and workforce development.

Most importantly, we have established a statewide, state-of-the-art Geographic Information System (GIS) platform to enhance our strategic planning and decision-making tools for state and local government officials, as well as our business, nonprofit and education partners. By working in concert with our federal and state officials, our local government shareholders and our private and nonprofit sector partners, our ADDs have helped the state of Kentucky make great progress for over 40 years.

Our pledge is to make the effort and investments needed today to make the state even better tomorrow.

Your 15 AREA DEVELOPMENT DISTRICTS (ADDs) are comprised of a statewide network of multi-county planning and development organizations covering all of Kentucky's 120 counties and its 435 cities. While each of the individual ADDs have primary service delivery areas, we here at FIVCO ADD work statewide and across local boundaries to advance state and regional priorities.

- The Fifteen (15) AREA DEVELOPMENT DISTRICTS (ADDs) generate a **Return on Investment of more than \$100 for every \$1** in local government dues each fiscal year.
- Your ADDs have assisted with over **500 infrastructure projects and contracts, valued at over \$550 million, and over \$250 million in transportation projects** with full transparency, accountability and proven results during the past year.
- Since inception, your ADDs have helped secure over **\$470 million in Economic Development Administration assistance for a total project cost of over \$810 million.** These projects have assisted in creation of over **25,000 jobs and the retention of over 35,000 jobs.**
- Collectively, your ADDs have provided over **50 gap financing and start-up loans** worth over **\$10 million** to entrepreneurs and

small businesses during the past year, leveraging over **\$50 million** in additional private investment.

- Your ADDs partnered with regional and local job training providers to serve over **6,000 workforce participants** in the most recent 12 month reporting period; with the initial 6 month earnings for those individuals placed in employment totaling more than **\$30 million.**
- Through the ADD-managed Area Agencies on Aging and Independent Living (AAAIL), over **225,000 seniors have benefited** from our nutrition, health and wellness services in the past year.
- We have worked together with state and local partners to **allow seniors and individuals with disabilities to stay in their homes with quality care** and attention under the Consumer Directed Option (CDO) program.

**“Area Development Districts bring a unique and requisite leadership to regional planning and economic development. Especially in rural Communities where resources are scarce, Kentucky ADDs tackle everything from water resource issues to GIS mapping to assisting the elderly.”**

**- U.S. REPRESENTATIVE HAROLD “HAL” ROGERS**

In FY2016, tourism injected more than \$13 billion into Kentucky's economy. Noting the impact that tourism has on the state's economy, including in our region, FIVCO ADD plans to take a more hands-on approach to developing and planning tourism efforts in the area. A number of assets exist in our region, including outdoor adventure and arts/cultural venues. Home to two state parks and two state resort parks, FIVCO ADD also abounds in other outdoor adventures, such as Olive Hill's Trail Town, the EK Bikeway, and Rush Off-Road. Sites and events, such as the Paramount Arts Center, Grayson Gallery & Art Center, and the Heritage Harvest Driving Tour offer visitors a wide range of arts/cultural events. FIVCO ADD intends to work with stakeholders in the region to plan and coordinate tourism more fully leverage the potential impact tourism has on our regional economy.
